ABOUT ME

Fullstack Developer focused on JavaScript/TypeScript (React, Node.js) and SQL databases. Experienced in designing relational architectures, integrating RESTful APIs, and developing user interfaces with a focus on accessibility and inventory management. Oriented towards writing clean code, understanding client requirements, and solving concrete technical problems.

FEATURED PROJECTS

Hardware Store Inventory Management System

Fullstack Developer | Private Client (2026)

- Designed and developed from scratch a custom web application for inventory management and stock control.
- Planned and implemented the relational database schema.
 - Implemented modules for product creation, modification, and deletion (CRUD), categorization, search filters, and stock movement logs.
 - Developed a RESTful API for data manipulation.
 - Built a dashboard for the user to track business statistics.

Technologies: React, Node, Express, PostgreSQL, TypeScript, HTML, CSS.

Paso Seguro App

Fullstack Developer | Personal Project (2026 - Present)

- Designed and developed the architecture of a navigation mobile app aimed at autonomy and assistance for visually impaired people.
- Implemented the responsive mobile interface and navigation logic.
 - Developed the backend architecture in Node.js for dynamic geolocation data processing.
 - Configured and integrated GPS accuracy parameters with alert margins at 40m, 20m, and 10m to optimize system precision against location errors.

Technologies: React Native, Node, Express, TypeScript, Geolocation APIs.

EDUCATION

Associate Degree in University Programming

Universidad Tecnológica Nacional - Bahía Blanca (2024-2026)

High School Diploma in Computer Science

Instituto Técnico "La Piedad" (2014-2022)

SKILLS

Git	TypeScript	Data Modeling
GitHub	JavaScript	AI-Assisted Development
Jira	API RESTful	Teamwork
Software Architecture	HTML	Adaptability
PostgreSQL	Python	Problem Solving
Express	Node	Autonomy
MySQL	React	Technical Communication

LANGUAGES

Spanish: Native English: Basic
